MASCOT - a quick, easy and quality conscious choice

It is easy to do business with MASCOT. You have an entire assortment of workwear and safety footwear at your disposal – from head to toe and for all seasons. You only need to shop in one place, and you'll get international support all over the world. In addition, you can automate many aspects of your trade with MASCOT, as you wish.

It is also quick to do business with MASCOT. We offer user-friendly, online ordering platforms that will save you time and minimise errors. We process orders from all over the world within 24-48 hours from a fully automated, ultramodern logistics centre with a continuous inventory of more than 4.8 million products. Flawless and fast – and, if you wish, we can man-pack the workwear.

If you choose MASCOT, you also make a quality conscious decision. It is not just that the workwear and safety footwear are thoroughly tested and of the highest quality, it is also that MASCOT offers you the most efficient ordering and service solutions. Last but not least, it means that when you buy products from MASCOT, you know they are manufactured under good working conditions. The vast majority of MASCOT's products are manufactured on our own CSR-certified factories in Vietnam and Laos. We guarantee good working conditions – and socially responsible workwear.

When you do business with MASCOT, you do business with a company that continuously develops its products, services and solutions. We constantly focus on the opportunities and limitations of our customers and potential customers. These inputs are the focal point in the development of new products and solutions from MASCOT. We will be one step ahead to deliver the best solutions to our customers because that means our customers also are a step ahead.

MASCOT® FOOTWEAR CASUAL

The MASCOT® FOOTWEAR CASUAL collection is for users who want classic sneakers. It is footwear without safety components such as toe cap and nail protection.

F0900-907-09
See page 63

62

MASCOT® FOOTWEAR MOVE

The MOVE collection consists of safety shoes and - boots with a low weight starting at merely 440 grams. Not surprisingly, this collection is among the lightest safety footwear on the market. The footwear in the MOVE collection has a modern design that lead the mind towards sporty sneakers and not heavy, traditional safety shoes. Footwear in the MASCOT® FOOTWEAR MOVE collection has a unique midsole made of Phylon that is both ground-breaking light and gives the shoes a comfortable elastic comfort. The MOVE collection is safety footwear that you don't want to take off.

All styles in the MASCOT® FOOTWEAR MOVE collection.

F0300-909-87

F0300-909-09

Can be found in both women's sizes (width 8, sizes 3.5-6.5) and men's sizes (width 10, sizes 6-13). F0300-909-87 only in men's sizes.

F0300-909

BOA® | FIT TO GO FURTHER™

MASCOT® FOOTWEAR MOVE | Safety shoe S1P with Boa® closure

Product number: F0300-909

Textile Size 42: 440 g

EU size: 36-40 Width 08 | 39-48 Width 10 | UK size: L 3.5-6.5 Width 08 | M 6-13 Width 10

Certified to EN ISO 20345 2011, safety class S1P SRC.

- The front part of the shoe bends flexibly with the foot.
- Footwear with the patented Boa® closure system is a great help on a busy day. The Boa® closure system allows you to quickly get your shoes on and off.
- Composite toecap. The composite material does not conduct heat or cold, so the composite toecap provides extra comfort in both hot and cold surroundings.
- The flexible nail protection of special textile increases comfort and protects against cold.
- Midsole of Phylon that gives the shoes a comfortable elastic comfort, and outer sole in rubber.
- The weight of the footwear is among the lowest on the market.
- ESD Approved.

MASCOT® FOOTWEAR MOVE | Safety shoe S1P with laces

Product number: Fo301-909

Textile Size 42: 440 g

EU size: 36-40 Width 08 | 39-48 Width 10 | UK size: L 3.5-6.5 Width 08 | M 6-13 Width 10

Certified to EN ISO 20345 2011, safety class S1P SRC.

- The front part of the shoe bends flexibly with the foot.
- The composite toecap is completely free of metal. The composite material does not conduct heat or cold, so the composite toecap provides extra comfort in both hot and cold surroundings.
- The flexible nail protection of special textile increases comfort and protects against cold.
- Shock-absorbing, light and flexible insole.
- Midsole of Phylon that gives the shoes a comfortable elastic comfort, and outer sole in rubber.
- The weight of the footwear is among the lowest on the market.
- ESD Approved.

ULTRA LIGHTWEIGHT

Lightweight safety footwear

Can safety footwear be light as a feather? Unfortunately not, but with the MOVE collection, we have done everything possible to reduce the weight of the parts within the shoes. Metal has been replaced with composite and textile, and by using new research and technology, heavy parts have been replaced with lighter alternatives. This makes the footwear in the MOVE collection among the lightest in the industry, very flexible and comfortable to wear.

F0303-901-09

F0303-901

- Shock-absorbing, light and flexible insole.
- Midsole of Phylon that gives the shoes a comfortable elastic comfort, and outer sole in rubber.
- The weight of the footwear is among the lowest on the market.
- ESD Approved.

ESD = ElectroStatic Discharge

ESD occurs when two materials with different electric charges are brought into contact with each other. If this electric charge is released to sensitive electronic components, such as a memory card, damage can result to the product. This in turn can involve high costs if parts or products then need to be repaired or replaced. The intensity of the charge depends on the type of material, as well as environmental factors such as humidity and temperature.

ESD-approved footwear dissipates the charge from the wearer's body, in accordance with EN 61340, when worn in conjunction with ESD compliant flooring.

MASCOT® FOOTWEAR ENERGY

Safety footwear from the MASCOT® FOOTWEAR ENERGY collection delivers exceptional comfort and freedom for both your back and your feet with the help of an extremely shock absorbing sole material of ETPU. The sole material efficiently absorbs the shock of stepping on hard surfaces so the pressure doesn't stress the legs and back.

MASCOT® FOOTWEAR ENERGY is optimal comfort for your feet. All materials at the forefoot are extremely flexible so the shoe flexibly follows and supports all movements. At the same time, the weight of the footwear is among the lowest on the market. The weight is kept down through metal-free lightweight materials like the composite toe cap and textile nail protection, which also make the footwear completely metal free.

All styles in the MASCOT® FOOTWEAR ENERGY collection.

F0130-849-91133

F0130-849-09888

Can be found in both women's sizes (width 8, sizes 3.5-6.5) and men's sizes (width 10, sizes 6-13). F0130-849-91133 only in men's sizes.

F0130-849

MASCOT® FOOTWEAR ENERGY | Safety shoe S1P with laces

Product number: F0130-849

Textile Size 42: 590 g

BOA® | FIT TO GO FURTHER™

With the Boa® system you can easily get your footwear on and off.

1. Press the wheel down to activate the system.
2. Turn the wheel until the shoe fits perfectly. The wheel fixes the laces while turning.
3. Pull up the wheel until it clicks, for quick release.

Quick and safe closure system

You might be familiar with the easy closure system from your sports shoes or hiking boots. But what about the safety footwear you use every day? Try footwear with the Boa® system. Not only are they very easy to take on and off, but the stainless steel laces distribute the pressure on the instep evenly, so nothing bothers. With Boa® the shoe has a secure fit and gives you a supportive and safe all-day comfort on all walking surfaces. Quickly and easily.

MASCOT® FOOTWEAR FLEX

The FLEX collection is your guarantee for optimum fit. The FLEX models are freedom to move for hours without getting tired feet. The foot is supported and stabilised at the back of the shoe and offers plenty of room for movements of the front of the foot. The footwear is also equipped with an insole with optimal arch support that can counteract the tendency to flat foot. Stepping into the footwear from the FLEX collection feels soft and comfortable. The sole has excellent shock absorption, and the front part of the shoe bends flexibly with the foot. At the same time, you get shoes that are lightweight; the weight of these safety shoes is among the lowest on the market.

All styles in the MASCOT® FOOTWEAR FLEX collection.

FREEDOM FOR YOUR FEET

FLEXIBLE

LIGHTWEIGHT

Feel the flexibility

You feel it right away; the shoe feels lightweight. It also passes your next test. You press the front part of the shoe towards the heel to see how easily it bends and quickly discover that the shoe is more flexible than most shoes. Then, when you try it on, you immediately notice that it is extremely comfortable to wear and feels flexible. Even after many hours at work. It feels like freedom for your feet. And this is true for all the styles in the FLEX collection.

MASCOT® FOOTWEAR FLEX | Safety shoe S3 with Boa® closure, Dyneema®

Product number: Fo122-771

Textile/suede Size 42: 620 g

EU size: 39-48 Width 10 | UK size: M 6-13 Width 10

Certified to EN ISO 20345: 2011, safety class S3 SRC.

- Insole with optimal arch support that can counteract the tendency to flat foot.
- The front part of the shoe bends flexibly with the foot.
- Uppers of durable CORDURA®/Kevlar®/Dyneema®.
- The composite toecap is completely free of metal. The composite material does not conduct heat or cold, so the composite toecap provides extra comfort in both hot and cold surroundings.
- Shock-absorbing, soft and flexible two-component sole of PU/PU.
- Slip resistant, durable sole (SRC-certified).
- ESD Approved.

MASCOT® FOOTWEAR FIT

The FIT collection has a comfortable fit. The footwear provides support and fits closely at the heel. At the same time, there is plenty of space in the front, allowing great freedom of movement for the toes and front of the foot. The FIT models are also lightweight, flexible and offer great shock absorption, retaining their comfort even after long days of wearing the safety footwear.

Stabilisation with MASCOT's patented multi-function shank.

Composite toe cap – does not conduct heat or cold.

Non-marking, flexible, lightweight and shock absorbing two-component sole of PU/PU, heat resistant up to 140° C.

The flexible nail protection of special textile increases comfort and protects against cold.

All styles in the MASCOT® FOOTWEAR FIT collection.

BOA® FIT TO GO FURTHER™

MASCOT® Manaslu | Safety Shoe S3 with Boa® closure

Product number: F0111-937

Leather Size 42: 590 g

EU size: 39-48 Width 11 | UK size: M 6-13 Width 11

Certified to EN ISO 20345: 2011, safety class S3 SRC.

- The flexible nail protection of special textile increases comfort and protects against cold. In addition, the textile midsole is larger and better protects against nails and sharp objects in a wider area compared with a steel midsole.
- Stabilisation with MASCOT's patented multi-function shank, makes our footwear suitable even when working on uneven surfaces or on ladders.
- The outsole of hard wearing PU is transfer resistant (non-marking). Very slip resistant sole/SRC.
- Shock-absorbing insole of EVA. Breathable and with TPU arch support. The footwear is ESD approved with this insole.
- The composite toecap is completely free of metal. The composite material does not conduct heat or cold, so the composite toecap provides extra comfort in both hot and cold surroundings.
- Footwear with the patented Boa® closure system is a great help on a busy day. The Boa® closure system allows you to quickly get your shoes on and off.

No more cold feet

Metal conducts heat and cold. In safety footwear with steel nail protection and metal toe caps, your feet, and especially your toes, can become uncomfortably cold when working in cold environments. With metal free shoes, you avoid this as your feet aren't exposed to additional cold or heat from the surroundings. The nail protection is made of a thick textile material that protects your feet against sharp impacts from below, just as with steel nail protection. The toe cap is made of a composite; a more lightweight material than steel. The composite toe cap also offers you certified protection against pressure – just as steel toe caps.

Metal free shoes

You will find the combination between metal free toe caps and metal free nail protection in the MOVE, ENERGY, FIT and FLEX collections. If you want to avoid metal completely, you should choose footwear without Boa®, as the Boa® system is based on a wire system of stainless steel.

Also remember!

... to choose your socks carefully. The socks have to be moisture wicking, so you won't get wet feet. Wet feet quickly become cold feet. Your socks may also need to be extra insulating if you work in cold environments.

MASCOT® FOOTWEAR INDUSTRY

The INDUSTRY collection offers robust and hard-wearing footwear for outdoor work. The footwear is designed to resist wear when crawling around on concrete floors, working in sewer pipes or in other similar environments. This footwear is ideal for more extreme conditions with a sole made of strong PU/rubber that is heat resistant up to 300° contact heat. The strong scuff cap makes the footwear extremely hard-wearing for kneeling work. It also has a non-slip sole, with a specially designed pattern that releases dirt and mud when the sole bends while walking.

Ergonomic aluminium toe cap for extra toe protection and increased space for the toes to move.

Suitable for working on the knee with durable TPU toe reinforcement.

Stabilisation with MASCOT's patented multi-function shank.

Shock-absorbing, extremely slip resistant two-component sole of PU/rubber, resistant to 300 °C contact heat.

All styles in the MASCOT® FOOTWEAR INDUSTRY collection.

- Special closure prevents sparks entering the boot.
- Slip resistant, durable sole (SRC-certified).
- The sole is oil and petrol resistant as well as resistant to certain chemicals and heat up to 300 ° C contact heat.
- Ergonomically designed aluminum toe cap for freedom of movement.
- Extremely durable PU scuff cap makes the footwear ideal for working on the knees.
- Double impact - both the removable insole and flexible PU / rubber sole are shock absorbent.

Stay warm with Thinsulate™

Keeps the heat in around your feet

Stores the foot's own heat in small air pockets

Allows moisture to pass through, keeping your feet dry

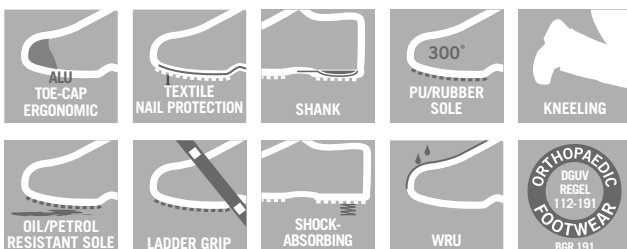

Foo84-902-09

Thinsulate™ Insulation is an insulating material which is used in many different types of shoes and clothing. The light synthetic fabric material stores heat from your feet in tiny air holes in the fabric, keeping them warm. At the same time, it passes moisture from the feet out through the material and away from the feet, keeping them dry. Thinsulate™ footwear is the obvious choice in footwear for cold situations, when it is vital to keep warmth in and moisture out.

Thinsulate
INSULATION

MASCOT® Craig | Safety Boot S3 with laces

Product number: Foo84-902

Full grain Size 42: 1025 g

EU size: 39-48 Width 11 | UK size: M 6-13 Width 11

Certified to EN ISO 20345: 2011, safety class S3 SRC, HRO.

- Insulating lining of Thinsulate™ Insulation ensures the foot stays warm despite the cold conditions.
- The sole is oil and petrol resistant as well as resistant to certain chemicals and heat up to 300 °C contact heat.
- Stabilisation with MASCOT's patented multi-function shank, makes our footwear suitable even when working on uneven surfaces or on ladders.
- The flexible nail protection of special textile increases comfort and protects against cold. In addition, the textile midsole is larger and better protects against nails and sharp objects in a wider area compared with a steel midsole.
- Ergonomically designed aluminum toe cap for freedom of movement.
- Extremely durable PU scuff cap makes the footwear ideal for working on the knees.

MASCOT® FOOTWEAR CLASSIC

In addition to all of their safety details, the footwear in the CLASSIC collection offers a very comfortable fit. There are also models in this collection that you should choose if you need footwear that is slightly broader than average. The footwear is made with flexible materials to provide great walking comfort. Stability on uneven surfaces is also ensured by a small stiffening insert in the back part of the sole, protecting the feet even further. The CLASSIC models are ideal for many types of tasks and trades within light construction and crafts, and when you are working both indoors and out.

Stabilisation with MASCOT's patented multi-function shank.

Ergonomic aluminium toe cap for extra toe protection and increased space for the toes to move.

Two-component sole of PU/TPU, resistant to 120°C.

The flexible nail protection of special textile increases comfort and protects against cold.

Extra long lifetime with durable TPU reinforcement at the toe.

All styles in the MASCOT® FOOTWEAR CLASSIC collection.

- Extra long lifetime with durable TPU reinforcement at the toe.
- Ergonomically designed aluminum toe cap for freedom of movement.

Slip resistance

It is crucial for your safety to have slip resistant footwear. Whether or not your shoes are slip resistant depends on the sole material and if the sole pattern is designed to offer superb grip. The sole pattern should be self-cleaning, so dirt and mud won't get stuck in the grooves as this can make the footwear heavy and inflexible to wear.

At MASCOT we use the latest research to make the soles slip resistant. All of MASCOT's soles are tested and approved according to both SRA and SRB (respectively, test with soap on ceramics and test with glycerol on steel),

meaning that they automatically achieve the best standard within slip resistant soles, SRC.

Also remember!

... to close your safety footwear. In this way your shoes will offer you better support, and you minimise the risk of twisting an ankle.

MASCOT® FOOTWEAR CASUAL

The MASCOT® FOOTWEAR CASUAL collection is for users who want classic sneakers. It is footwear without safety components such as toe cap and nail protection. Footwear in the CASUAL collection is lightweight and flexible, and produced in soft, shock absorbing materials that provide a great comfort. The collection is suited for users that need good looking and comfortable everyday shoes without toe cap or nail protection.

Non-safety shoe without safety components

F0900-907-09

F0900-907

MASCOT® FOOTWEAR CASUAL | Sneakers with laces

Product number: F0900-907

Suede Size 42: 295 g

EU size: 40-47 Width 10 | UK size: M 6.5-12 Width 10

- Non-safety – footwear without safety components.
- The front part of the shoe bends flexibly with the foot.
- Upper material in suede.
- Outer sole in rubber – no scuff marks.
- Comfortable fit.

Choose the correct size and width

Sizes

MASCOT's sizes are average compared to the usual shoe sizes. If you normally use size 42, then a size 42 is likely to be correct in MASCOT's safety footwear. MASCOT carries shoes in sizes 35-48. We recommend, however, that you try on the shoes before you buy them, as you need to take into account how wide your shoes should be.

Widths

Not everyone's feet are the same width, and therefore you can choose between different widths in MASCOT's footwear assortment. Width 11 is the normal width that fits the majority of men. If you have a slightly smaller foot, you should take a closer look at the MOVE, ENERGY and FLEX collections, where you will find safety shoes and safety boot in width 10. Most women fit width 8, and therefore MASCOT also carry a number of shoes in width 8. These shoes come in smaller sizes, size 35-41. Safety footwear should fit right away.

Insoles

You can buy extra insoles in different width and sizes.

MASCOT® Monviso | Insoles with shock absorption

Product number: FTo86-980

100% EVA

EU size: 35-41 Width 08 | 39-48 Width 11 | UK size: L 2.5-7 Width 08 | M 6-13 Width 11

- Shock-absorbing insole of EVA. Breathable and with TPU arch support.
- ESD Approved.

FTo87-980-09

MASCOT® FOOTWEAR | Insoles with shock absorption, anti-bacterial

Product number: FTo87-980

100% High Poly Tech(PU)

EU size: 35-41 Width 08 | 39-48 Width 11 | UK size: L 2.5-7 Width 08 | M 6-13 Width 11

- Developed in an anti-bacterial material that neutralises odour.
- Breathable.
- Shock-absorbing, light and flexible insole.
- TPU arch support relieves and supports the arch.
- ESD Approved.

Comfortable insoles with arch support

You can ensure optimal comfort and support in your safety footwear by choosing insoles that fit your feet perfectly. Choose from three levels of arch support in shock-absorbing insoles.

For flat feet

Follows the natural shape of your foot to provide the best support

**SHOCK
ABSORBING**
for extreme comfort

For normal arched feet

Follows the natural shape of your foot to provide the best support

**SHOCK
ABSORBING**
for extreme comfort

TPU
HEEL & ARCH SUPPORT
Provides stability

For high-arched feet

Follows the natural shape of your foot to provide the best support

**SHOCK
ABSORBING**
for extreme comfort

TPU
HEEL & ARCH SUPPORT
Provides stability

Approved according to EN ISO 20345

MASCOT's insoles FT090, FT091 and FT092 are approved in accordance with the EN ISO 20345 safety certification when used together with footwear in the MASCOT® FOOTWEAR MOVE, ENERGY, FLEX, FIT and INDUSTRY collections. Changing insoles will otherwise affect the footwear's overall safety certification. That is why it's important to choose approved insoles that match your footwear.

FT090-276-09

MASCOT® FOOTWEAR | Insoles with shock absorption, minimum arch support

Product number: FT090-276

100% High Poly Tech foam

EU size: 35-38 Width 08 | 39-48 Width 11 UK size: L 2.5-5 Width 08 | M 6-13 Width 11

- Breathable by means of small ventilation holes.
- Extremely shock-absorbing High Poly Tech foam in the entire sole.
- Extra walking comfort with shock-absorbent cushioning under the forefoot and heel.
- Minimum arch support for flat feet.
- ESD Approved.

FT091-276-09

MASCOT® FOOTWEAR | Insoles with shock absorption, medium arch support

Product number: FT091-276

100% High Poly Tech foam

EU size: 35-38 Width 08 | 39-48 Width 11 UK size: L 2.5-5 Width 08 | M 6-13 Width 11

- Breathable by means of small ventilation holes.
- Extremely shock-absorbing High Poly Tech foam in the entire sole.
- Extra walking comfort with shock-absorbent cushioning under the forefoot and heel.
- With optimised TPU arch support that can counteract the tendency to flat foot.
- Medium arch support for normal arched feet.
- ESD Approved.

FT092-276-09

MASCOT® FOOTWEAR | Insoles with shock absorption, maximum arch support

Product number: FT092-276

100% High Poly Tech foam

EU size: 35-38 Width 08 | 39-48 Width 11 UK size: L 2.5-5 Width 08 | M 6-13 Width 11

- Breathable by means of small ventilation holes.
- Extremely shock-absorbing High Poly Tech foam in the entire sole.
- Extra walking comfort with shock-absorbent cushioning under the forefoot and heel.
- With optimised TPU arch support that can counteract the tendency to flat foot.
- Maximum arch support for high-arched feet.
- ESD Approved.

Care products for your safety footwear

Extend your safety footwear's life span. Use care products and impregnation spray before you use the footwear for the first time to protect against moisture and dirt.

FTo89-980-88

MASCOT® FOOTWEAR | Foam cleaning set.

Product number: FTo89-980

125 ml

- Effective and long-lasting protection of all types of materials.
- Maintains the product's breathability and flexibility and refreshes the colour.
- Innovative carbon technology with a long-lasting effect against moisture and dirt.
- Without solvents.

FTo88-980-88

MASCOT® FOOTWEAR | Impregnation Spray for all types of materials

Product number: FTo88-980

300 ml

- Effective and long-lasting protection of all types of materials.
- Innovative carbon technology with a long-lasting effect against moisture and dirt.
- Application develops a net-like structure of polymer chains which makes the footwear water resistant, yet breathable.

Good advice for choice of socks

While footwear ensures support and stability, socks provide good comfort for skin and feet. The most important tasks for socks are to regulate heat, manage moisture and ensure that the feet are comfortable in the footwear. Comfort is paramount when you are wearing work socks for 10 - 12 hours a day.

Socks must manage moisture

Your feet exude moisture. The socks' job is to manage the moisture so your feet do not feel wet and thereby get cold. Socks made from synthetic materials are good at transporting sweat away and drying quickly. If moisture can leave the shoe quickly, synthetic materials are a good choice.

Socks should regulate heat

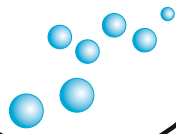

Socks with wool content are usually thicker and thereby warmer. Wool also has impressive moisture and temperature-regulating properties. Wool can absorb a lot of moisture, and as a result of the wool's water-repellent surface, it will not feel wet against the skin. Wool even retains temperature-regulating properties, even when wet. Thick socks will also usually relieve pressure on the sole of the feet.

Choose the correct size

When you choose footwear, you usually ensure that there is a lot of room. When you choose socks, you should do the opposite. A good work sock should fit the foot tightly, and hug the foot snugly with elastic materials. It is almost better to choose a sock that is a little too small than one that is too big. That is because socks that fit loosely crease, and can give you blisters. Remember when choosing, thick socks have a tendency to become a little looser than thin socks.

MOISTURE MANAGEMENT

Moisture Management

The selected fabric (such as Merino Wool and COOLMAX®) has the ability to absorb moisture and distribute it away from your feet. Moisture Management ensures maximum breathability which keeps your feet dry.

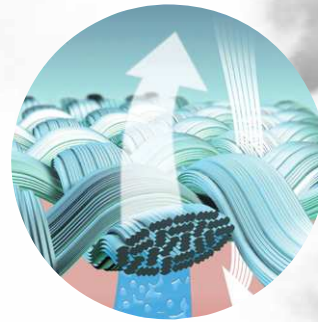

LYCRA®

LYCRA® adds comfort, fit, shape retention, durability and freedom of movement. LYCRA® can be stretched up to seven times its initial length before springing back to the original position once tension is released. LYCRA® gives stability and holds the sock in place on the foot.

Ergonomic support

All MASCOT's socks are fitted with ECS – Ergonomic Comfort Support. It is a technology that places extra soft reinforcements in the socks where the foot really needs padding for the sake of comfort. For example, under the heel and toe or under the whole foot. Several models also feature specially designed right and left socks with comfort zones.

COOLMAX®

COOLMAX® is the market leader with regard to moisture dispersion. COOLMAX® quickly transports moisture away from your feet and disperses it through the fabric where it can evaporate quickly. Socks containing COOLMAX® are soft, breathable and quick-drying.

Left and right socks

Special left and right socks which are contoured for improved fit

MASCOT® Kasama | Socks, moisture wicking

Product number: **50409-876**

36% wool/50% acrylic/12% polyamide/2% elastane - 80 g per pair

Size: 39/43 | 44/48

- Elastane gives stability and holds the sock in place on the foot.
- Reinforced heel and toe increase durability and provides extra protection.
- A mixture of wool and acrylic gives great warmth, comfort and breathability.
- Suitable for closed footwear and as over-socks.

A42

MASCOT® Moshi | Socks, moisture wicking

Product number: **50406-877**

85% polyester (COOLMAX® PRO)/13% polyamide/2% LYCRA® - 95 g per pair

Size: 39/43 | 44/48

- COOLMAX® ensures efficient moisture wicking, keeps the body dry and prevents chilling.
- Breathable and moisture absorbing.
- Elastane gives stability and holds the sock in place on the foot.
- Reinforced heel and toe increase durability and provides extra protection.

0918

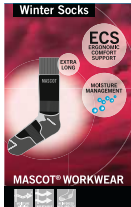

MASCOT® Maseru | Socks, short style, moisture wicking

Product number: **50411-881**

42% polyester (COOLMAX®)/38% cotton/18% polyamide/2% LYCRA® - 62 g per pair

Size: 36/38 | 39/43 | 44/48

- COOLMAX® ensures efficient moisture wicking, keeps the body dry and prevents chilling.
- Elastane gives stability and holds the sock in place on the foot.
- The socks have a special right and left - formed to give optimal support to the foot.
- Reinforced heel and toe increase durability and provides extra protection.

0918

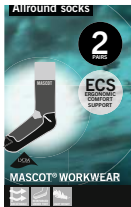

MASCOT® Lubango | Socks, long style, moisture wicking

Product number: **50404-876**

36% wool/50% acrylic/12% polyamide/2% elastane - 90 g per pair

Size: 39/43 | 44/48

- A mixture of wool and acrylic gives great warmth, comfort and breathability.
- Strong fabric which holds its shape well.
- Elastane gives stability and holds the sock in place on the foot.
- Reinforced heel and toe increase durability and provides extra protection.
- Suitable for closed footwear and as over-socks.

1809

MASCOT® Tanga | Socks, lightweight

Product number: **50407-875**

83% cotton/15% polyamide/2% elastane - 61 g per pair

Size: 39/43 | 44/48

- Light fabric.
- Breathable, moisture absorbing and durable.
- Elastane gives stability and holds the sock in place on the foot.
- Terry cushioning under the foot gives extra protection and durability.

0918

COOLMAX®

MASCOT® Asmara | Socks, moisture wicking

Product number: **50410-881**

42% polyester (COOLMAX®)/38% cotton/18% polyamide/2% LYCRA® - 74 g per pair

Size: 36/38 | 39/43 | 44/48

- COOLMAX® ensures efficient moisture wicking, keeps the body dry and prevents chilling.
- The socks have a special right and left - formed to give optimal support to the foot.
- Elastane gives stability and holds the sock in place on the foot.
- Reinforced heel and toe increase durability and provides extra protection.

09

MASCOT® Kisumu | Socks, insulating

Product number: **50455-914**

33% wool/33% acrylic/32% polyamide/2% elastane - 85 g per pair

Size: 39/43 | 44/48

- Thick socks.
- Contains wool for insulation and improved comfort in cold environments.
- Reinforced heel and toe increase durability and provides extra protection.
- Suitable for closed footwear and as over-socks.

09

MASCOT® Mongu | Socks

Product number: **50454-913**

34% cotton/32% polyamide/29% polyester/3% viscose/2% elastane - 70 g per pair

Size: 39/43 | 44/48

- Thick socks.
- Reinforced heel and toe increase durability and provides extra protection.

09

COOLMAX®

MASCOT® Manica | Socks, moisture wicking

Product number: **50453-912**

41% polyester (COOLMAX®)/29% cotton/28% polyamide/2% LYCRA® - 65 g per pair

Size: 39/43 | 44/48

- Moisture wicking and good breathability.
- COOLMAX® ensures efficient moisture wicking, keeps the body dry and prevents chilling.
- Reinforced heel and toe increase durability and provides extra protection.

Symbol overview

MASCOT's safety footwear comes with a range of symbols. The symbols give you a quick overview of the footwear's features and functions. See what the different symbols mean here.

Symbol overview

Flexible

Footwear with this symbol is extremely flexible where the shoes bend. This gives you more freedom to move around as you need to during the workday. Freedom for your feet.

Lightweight

The symbol indicates that the safety footwear has a much lower weight than average. Choose footwear with this symbol, if you are looking for flexible and lightweight footwear.

Metal free

Footwear with this symbol contains no metal. The midsole, toe cap and eyelets are entirely metal-free. As such, the footwear is very useful, for example, in airports.

Water-resistant in accordance with the standard

WRU is short for Water Repellent Upper and indicates that the upper material is water-repellent.

Composite toe cap

The purpose of the toe cap is to protect the toes against external blows and pressure. The cap has been tested and can resist blows and pressure of 200 joules (EN 12568). The composite toe cap does not contain metal. As composite is not thermally conductive it provides comfort in cold and warm environments.

Ergonomic aluminium toe cap

The purpose of the toe cap is to protect the toes against external blows and pressure. The cap has been tested and can resist blows and pressure of 200 joules (EN 12568). The ergonomically correct shaped aluminium toe cap has a spacious fit that allows place for the toes to move, e.g., when kneeling, and provides additional protection for the little toe and the big toe.

Textile nail protection

Nail protection made of special fibres. The nail protection is certified under EN ISO 20345, and complies with the demands for S3-footwear. The advantage is that the footwear is more flexible and gives better protection in warm and cold conditions which provides a high degree of comfort for the wearer.

Steel mid-sole protection

The sole of the footwear is equipped with a thin steel plate, which prevents nails and sharp objects from penetrating the shoe and foot. Steel mid-sole protection has been tested in accordance with norm: EN ISO 12568.

SHANK

Stabilising and shock absorbing shank

The specially developed multi-functional shank is made of a stiff nylon material. The shank stabilises the middle part of the foot and makes the footwear bend at the right position. This shank includes a small shock-absorbing cushioning pad. The position of the shank ensures that the heel is in constant contact with this cushioning area, which provides a good foothold.

NON-MARKING SOLE

Non-marking sole – no scuff marks

Look for this symbol if you want to be absolutely sure that your footwear does not leave marks on the floor. Footwear with this symbol is provided with a sole of PU/PU, which leaves no scuff marks.

120°
PU/TPU SOLE

PU/TPU sole material, resistant to 120°C

The comfort sole is made of PU and the sole is made of TPU. The soles are resistant to 120°C. TPU is a thermoplastic material with a very high wearability. All MASCOT PU/TPU soles are oil and petrol resistant.

140°
PU/PU SOLE

PU/PU sole material, resistant to 140°C

Comfort soles as well as running soles are made of PU. The soles are resistant to 140°C. PU is a foam material, which is very shock-absorbing and slip-resistant. All MASCOT PU/PU soles are oil and petrol resistant.

300°
PU/RUBBER SOLE

PU/rubber sole material, resistant to 300°C contact heat

The comfort sole is made of PU and the running sole is made of rubber. Rubber is very heat resistant and can resist temperatures up to 300°C contact heat. All MASCOT PU/rubber soles are oil and petrol resistant as well as resistant to certain chemicals.

300°
RUBBER SOLE

Rubber sole material, resistant to 300°C contact heat

Rubber is very heat resistant and can resist temperatures up to 300°C contact heat.

OIL/PETROL RESISTANT SOLE

The sole is oil and petrol resistant and resistant to certain chemicals

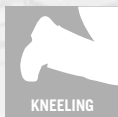

The sole is oil and petrol resistant and resistant to certain chemicals.

SHOCK-ABSORBING

Shock-absorbing comfort sole

All of MASCOT's comfort soles are shock-absorbing in the entire sole. This provides good walking comfort.

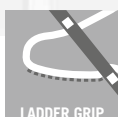

Scuff cap, suitable for working on the knees

A scuff cap is an extra toe reinforcement on the outside of the upper leather. The toe reinforcement increases durability significantly, which prolongs the lifetime of the footwear. The footwear is suitable for kneeling work.

Ankle protection

The wearer's ankle is protected against blows from the side by MASCOT's specially developed protection pad at the ankle bone on the inner and outer side of the footwear.

Ladder grip

A sole edge under the sole prevents slippage on a ladder.

Orthopaedic Footwear: Suitable for modifications

Selected models of MASCOT® FOOTWEAR are suitable for orthopaedic modifications. Due to regulations, these modifications may only be carried out by Mander-Malms Schuhtechnik GmbH in Germany.

Footwear brands

HRO

Heat:

Choose HRO-approved footwear. Footwear with HRO-approved soles can resist up to 300 °C contact heat. For the sake of comfort, you should choose footwear with breathability, so the moisture can evaporate.

INSULATION

Thinsulate™ Insulation

Thinsulate™ Insulation is an insulating inner liner which is moisture resistant, breathable and keeps your feet warm.

Static electricity:

Footwear with an ESD label avoid electrostatic charging and are able to conduct away controlled static electricity from the body. This will avoid damages to, for example, sensitive electronic components.

SympaTex® membrane

Footwear with SympaTex® is breathable and waterproof. To comply with the norm for waterproof footwear, the footwear must be able to resist water for at least 12 hours. SympaTex® complies with this norm.

Uneven/slippery surface:

Choose footwear with the highest certification in terms of slip resistant soles, SRC.

BOA®

**FIT TO GO
FURTHER.™**

Patented Boa® Fit System

Boa® Fit System is a clever locking system and an alternative to traditional drawstring closures. Boa® Fit System consists of a mechanical wheel that is connected to stainless steel laces. Rotate the wheel to lace the footwear and lift the wheel to loosen the laces. Boa® Fit System is particularly convenient when you need your shoes on and off several times during the day.

MASCOTEX®

MASCOTEX® membrane

MASCOTEX® upper material provides breathable and waterproof footwear by means of a membrane in the material. To comply with the norm for waterproof footwear, the footwear must be able to resist water for at least 6 hours. MASCOTEX® complies with this norm.

Which industry do you work in?

No matter which industry you work in, the job you do will place specific demands on your footwear. At MASCOT, we have divided our footwear into five key industries to help you easily find the best footwear for your line of work.

But do be aware that footwear suitability is determined by more factors than industry alone. Safety class, working environment and the footwear's upper material are all important things to consider when looking for the right footwear for your job.

Industry Symbols

Craftsmen and light building

Look for this symbol if you work as a carpenter, electrician, painter, engineer, etc.

Light industry and logistics

This symbol helps you find footwear for such industries as electronics and assembly, warehousing, transport and related areas.

Construction

Find solid and hard-wearing footwear with this symbol if you are a bricklayer, hod carrier, labourers, roofer, rail worker or in any other similar trade.

Heavy industry

Keep an eye open for this symbol if you work with metalworking, machinery manufacture or in a foundry.

Corporate Wear

Products with this symbol are for occupations where it is important to have a presentable corporate image, but where safety footwear is not required.

EN ISO 20345

EN ISO 20345

EN ISO 20345 is a European standard for safety footwear that ensures that safety shoes, boots and sandals conform to the necessary requirements of working in areas where safety is a high priority. All safety footwear from MASCOT® FOOTWEAR is certified in accordance with EN ISO 20345 and is also covered by safety classes S1P and S3.

Safety Classes	S1P	S3
Safety footwear approved to EN ISO 20345 the following applies:	●	●
Mid-sole protection	●	●
Protective toe cap	●	●
Slip resistant	●	●
Oil and petrol resistant outer sole	●	●
Shock-absorbing	●	●
Antistatic	●	●
Breathable	●	●
Water-repellent or waterproof		●

Choose the right safety footwear

There are several important factors to consider when choosing the right footwear for your work day.

1

Step 1 - Industry

Your industry will provide you with general guidelines as to which footwear you should choose.

2

Step 2 - Upper material

The upper material should be able to withstand the challenges of the environment you work in. If you work in an environment where you are exposed to concrete, chemicals or similar, you should choose footwear with an upper material made from full-grain leather. Footwear with an upper material made from fabric tends, however, to be more flexible.

	Step 1 Industry	Step 2 Upper material	Step 3 Safety class	Step 4 Special demands
MASCOT® FOOTWEAR MOVE				
F0300-909	 	Textile	S1P	
F0301-909	 	Textile	S1P	
F0302-946	 	CORDURA®/full grain buffalo leather	S1P	
F0303-901	 	Oil Nubuck leather	S3	
F0304-901	 	Oil Nubuck leather	S3	
MASCOT® FOOTWEAR ENERGY

F0131-849	 	Textile	S1P	
F0132-996	 	Textile	S1P	
F0133-996	 	Textile	S1P	
F0134-902	   	Full grain leather	S3	
F0135-902	   	Full grain leather	S3	
F0136-902	   	Full grain leather	S3	
MASCOT® FOOTWEAR FLEX				
F0121-770	 	Nylon/suede	S3	
F0122-771	 	Textile/suede	S3	
F0124-773	 	Textile	S1P	
F0125-773	 	Textile	S1P	
F0127-775	  	Full grain buffalo leather	S3	

3

Step 3 – Safety class

If you mainly work outside, you may need footwear that is water-repellent. Look for footwear with an S3 safety class in any of MASCOT's collections.

4

Step 4 - Special demands

You should also consider whether your safety footwear is subjected to any special conditions during the working day, such as cold temperatures, paint or frequent wear on certain parts of the shoe. If you have to spend a lot of time kneeling down, for example, then you should choose footwear that offers the highest possible level of external toe reinforcement.

	Metal free	Composite toe cap	Aluminium toe cap	Textile nail protection	Steel mid-sole protection	Non-marking sole – no scuff marks	PU/TPU sole material, resistant to 120°C	PU/PU sole material, resistant to 140°C	Rubber sole material, resistant to 300°C contact heat	The sole is oil and petrol resistant and resistant to certain chemicals	Shock-absorbing comfort sole	Stabilising and shock absorbing shank	Scuff cap, suitable for working on the knees	Ladder grip	Ankle protection
