**MASCOT® ADVANCED | Trousers with Dyneema® kneepad pockets and with detachable holster pockets, four-way stretch, lightweight**

**Product number: 17031-311**

93% nylon/7% elastane - 250 g/m²

Leg length and size: 76 cm: C 46-C 58 • 82 cm: C 42-C 68 • 90 cm: C 46-C 62

- The stretch material is flexible in all directions providing a unique freedom of movement with nothing that tightens or bothers.
- The water-repellent multifunctional stretch material combines a low weight with a very high durability.
- Well-designed holster pockets of durable CORDURA® can easily be zipped off when not in use, if they have to be emptied, or if the trousers need to be washed.
- The stretch kneepad pockets are made with a combination of CORDURA®, Kevlar® and the exceptionally durable fibre, Dyneema®.
- Effective ventilation at the knee area via a zipper on the side of the leg.
- Extra visibility with the help of reflectors.

*Dyneema® and Dyneema®, the world's strongest fiber™ are trademarks of DSM.*

## Detachable, durable holster pockets

Holster pockets are essential in work situations where easy access to tools, bolts and bits is important. These holster pockets are made of durable CORDURA® and can easily be zipped off when not in use; a distinct advantage if you only occasionally use the holster pockets. The holster pockets can also be zipped off when the trousers need to be washed, so you avoid having to empty the holster pockets.

## Stretch material that follows all body movements

The stretch material is flexible in all directions providing a unique freedom of movement with nothing that tightens or bothers. The water-repellent multifunctional stretch material combines low weight with very high durability. The flexible material feels soft and comfortable - almost like a second skin.

## Multifunctional kneepad pockets

Forget overheated knees. On the inside of the knee you can open ventilation ducts that initiate airflow. On the side of the leg, via a zipper, you can easily remove the kneepads, even while wearing the trousers, so they aren't keeping your knees warm unnecessarily. The stretch kneepad pockets are made with a combination of CORDURA®, Kevlar® and the exceptionally durable fibre, Dyneema®.

## Integrated pockets with plenty of space

These trousers have plenty of space for tools. In addition to the holster pockets, the trousers have a thigh pocket with phone pocket and detachable ID card holder, a durable ruler pocket of CORDURA®, front pockets and back pockets. As something new, the pockets are fully integrated in the design, so with the stretch fabric, you can load up the pockets without affecting your freedom of movement.

## Get all the advantages of the correct leg length

It is crucial that you choose trousers that fit your leg length in order for kneepad pockets and other details to be placed where you need them. These trousers come in three leg lengths as standard: 76, 82 and 90 cm. The trousers can be shortened by up to 3 cm and still retain the ergonomic design, the press stud adjustment and the reinforcement at foot. See how to find your correct leg length on page 610-611.

FREEDOM OF MOVEMENT

MASCOT® ADVANCED | Trousers with kneepad pockets, four-way stretch, lightweight.

Product number: **17179-311**

93% nylon/7% elastane - 250 g/m²

Leg length and size: 76 cm: C 46-C 58 • 82 cm: C 42-C 68 • 90 cm: C 46-C 62

- The stretch material is flexible in all directions providing a unique freedom of movement with nothing that tightens or bothers.
- The water-repellent multifunctional stretch material combines a low weight with a very high durability.
- The kneepad pockets of durable CORDURA® are adjustable so the kneepads have the optimal position on your knees.
- The kneepads are easily inserted from the sides via a zipper, even while wearing the trousers.
- Effective ventilation at the knee area via a zipper on the side of the leg.
- As standard in three different leg lengths, so you can choose the best fit and optimal placement of details just for you.

## ¾ length trousers that fit - regardless of your height

With trousers, you can always choose different leg lengths as standard, but ¾ length trousers often come in just one leg length. The cord adjustment in these ¾ length trousers is essential for your comfort as you can easily adjust the leg length, so the kneepad pockets are always in the right place regardless of your height and leg length. In addition, you will achieve full utilisation of the ergonomically designed trouser leg.

**MASCOT® ADVANCED | ¾ Length Trousers with detachable holster pockets, four-way stretch, lightweight.**

**Product number: 17049-311**

93% nylon/7% elastane - 250 g/m²

Leg length and size: 53 cm: C 42-C 68

- The water-repellent multifunctional stretch material combines a low weight with a very high durability.
- The stretch material is flexible in all directions providing a unique freedom of movement with nothing that tightens or bothers.
- Well-designed holster pockets of durable CORDURA® can easily be zipped off when not in use, if they have to be emptied, or if the trousers need to be washed.
- Thigh pocket with phone pocket and integrated ID card holder.
- The stretch kneepad pockets are made with a combination of CORDURA®, Kevlar® and the exceptionally durable fibre, Dyneema®.
- Extra visibility with the help of reflectors.

*Dyneema® and Dyneema®, the world's strongest fiber™ are trademarks of DSM.*

## The entire assortment at your disposal

MASCOT's assortment consists of more than 600 products in up to 24 different colours. We have matched the colours in the ranges so you can easily mix and match products across the ranges. For MASCOT® ADVANCED, you will find matching T-shirts, multifunctional underwear and sweatshirts in MASCOT® CROSSOVER (pages 238-293), and socks, caps and additional accessories in MASCOT® COMPLETE (page 412).

# We produce the clothing

MASCOT's workwear is manufactured at MASCOT's own factories in Vietnam and Laos, where we have more than 2000 MASCOT employees. The vast majority of our workwear is produced by us, which gives us great flexibility to cope with ever-changing demand. But, even more important: It allows for 100% quality assurance, not only with regard to your MASCOT products, but also in terms of the employees' working environment and conditions. Read more about the production on page 6.

**MASCOT® ADVANCED | Trousers with Kevlar®/Dyneema® kneepad pockets, four-way stretch, lightweight.**

**Product number: 17079-311**

# Dress in layers

## Keep warm | Stay dry

Keeping warm does not necessarily mean dressing in the heaviest jacket you can find. It is about choosing the right clothes from inner to outer.

# 1

STAY DRY

MOISTURE WICKING

### LAYER 1 — Stay dry

The clothes that you wear closest to the skin must have a strong ability to absorb moisture, transfer it away from the body and distribute it to a larger area to allow the moisture to evaporate quickly.

# 2

KEEP WARM

INSULATING

### LAYER 2 — Keep warm

The middle layer should be insulating and breathable. If it is extra cold, you can clothe yourself with several thin insulating layers.

# 3

WEATHER PROTECTION

WIND AND WATER PROTECTION

### LAYER 3 — Protect against the weather

The outer layer should be breathable to allow moisture from the body to escape. In addition, it should be windproof and waterproof/water-repellent.

MASCOT® ADVANCED | Jacket, four-way stretch, waterproof, lightweight

Product number: 17001-411

87% polyamide/13% elastane - 200 g/m²

Certified to EN 343 - class 3/3.

Size: XS-4XL

- The stretch material is flexible in all directions providing a unique freedom of movement with nothing that tightens or bothers.
- The waterproof multifunctional stretch material combines a low weight with a very high durability.
- Breathable, wind and waterproof with taped seams.
- Extra visibility with the help of reflectors.
- Certified to EN 343 - certified protection against rain.

# CLIMASCOT®

Lightweight Insulation

## 2

STAY WARM

INSULATING

## MASCOT® ADVANCED

## How many layers do you need?

In the transition period between two seasons you can often do with two layers – a moisture wicking layer and an insulating layer. The thermal jacket from MASCOT® ADVANCED with its insulating CLIMASCOT®-lining, is an obvious choice when you are looking for a lightweight and soft jacket – layer 2. When the weather is getting colder, the thermal jacket functions exceptionally well as an insulating middle layer due to the lining's low density and unique composition. Read more about CLIMASCOT® Lightweight Insulation on page 76.

# 3

**WEATHER  
PROTECTION**

**WIND AND WATER  
PROTECTION**

## Adjust the jacket to make it fit you

The detachable hood, the high collar and the bottom edge are all adjustable with elastic drawstrings. Use these adjustment options to protect yourself in the best possible way against cold and wind. The hood is designed with an extra piece in the front to provide further protection against rain.

## Certified weather protection

The jacket is breathable, wind and waterproof and is approved in accordance with the norm EN 343 and EN 342. The jacket has a waterproof zip and internal storm flap. With its ergonomic fit and stretch material, the jacket is very comfortable to wear and provides full freedom of movement.

## Stay warm with CLIMASCOT®

The jacket's lining is of the brand CLIMASCOT® Lightweight Insulation. Besides having a high insulating power, CLIMASCOT® is a breathable lightweight material that takes up very little room when compressed. You will find five products with CLIMASCOT® in this range. Find the jacket on pages 69 and 74, the gilet page 76 and the shirt page 79.

## Functional at the back

The back offers plenty of room for printing a company logo. An internal zip at the lower back offers the possibility for logo printing without damaging the CLIMASCOT® lining. On the back you will also find a pair of elongated reflectors to make you more visible.

## Extra protection against cold

The lining alone cannot protect you against the cold, so there is extra protection at the hands and the lower back. The sleeves have an internal rib at cuffs and holes for your thumbs, to ensure the jacket covers the back of the hand. The jacket has an extended back to provide extra protection at the lower back – also when bent forward.

#### MASCOT® ADVANCED | Knitted Jacket with membrane

Product number: **17105-309**

78% polyester/15% acrylic/5% viscose/2% wool - 460 g/m²

Size: XS-4XL

- The knitwear material is three layers of fabric bonded together: the outer layer is knit, the inside is fleece and between the two is a windproof and water-repellent membrane.
- Breathable, windproof and water-repellent.
- Modern, close fit with great freedom of movement.
- Extra high collar is adjustable - drawstring stoppers are hidden in the collar so as not to bother.
- Extra visibility with the help of reflectors.

## Knitted Jacket — a new type of softshell

The knitwear material in MASCOT® ADVANCED is three layers of fabric bonded together: the outer layer is knit, the inside is fleece and between the two is a wind and waterproof membrane. The result is a knitted jacket that is flexible, breathable, windproof and water-repellent – almost like a softshell. On the underside of the sleeves and along the sides, a thinner fabric is inserted to give you optimal freedom of movement and comfort.

LIGHTWEIGHT

WATER REPELLENT

**CLIMASCOT®**  
Lightweight insulation

MASCOT® ADVANCED | Jacket with CLIMASCOT® water-repellent

Product number: **17015-318**

100% polyester - 260 g/m²

Size: S-3XL

- Unique CLIMASCOT® insulation ensures effective warmth, and is lightweight, soft, and takes up almost no space when compressed.
- Water-repellent.
- Ribbed collar.
- Chest pocket suitable for logo printing.
- Inside pockets.

## Innovative lining

The thermal jacket's lining is of the brand CLIMASCOT® Lightweight Insulation. Besides having a high insulating power, CLIMASCOT® is a breathable lightweight material that takes up very little room when compressed. The environment has also been considered with CLIMASCOT®, as it is partially made from recycled materials.

## Logo print on the clothes

Get logo print on the jacket and show your customers who you represent. Because of the quilt, thermal jackets aren't normally suited for logo print. However, on this jacket the chest pocket is suited for logo printing with many different transfer types.

## Pockets and details

The chest pocket is spacious and has a vertical zipper that makes it easy to use. In addition, the jacket has two front pockets with press studs and inner pockets.

## One jacket for everything

This thermal jacket can be used for everything. It keeps cold out with the insulating lining, while it is still very lightweight. And when the weather gets colder and rainy, it functions perfectly as an insulating layer under a certified waterproof jacket.

## On the job with style

With ribbed cuffs in a light shiny, softshell fabric the jacket has a cool look and a modern fit. With this retro-thermal jacket the leather details and the multi-coloured zipper are details from the current fashion, while the well-known quilt structure is kept from the original thermal jackets.

# CLIMASCOT®

Lightweight Insulation

## Stay warm with CLIMASCOT®

The product is lined with CLIMASCOT®, which is a very insulating, lightweight and soft material that takes up almost no space when compressed. The environment has also been considered with CLIMASCOT®, as it is partially made from recycled materials. You will find three products with CLIMASCOT® in MASCOT® ADVANCED. See the winter jacket and the thermal jacket on pages 70 and 74. Find also CLIMASCOT®-lining in other ranges – see pages 29 and 94.

## A new generation of lightweight fleece jumpers

With a stretch fabric and an elegant, smooth surface, you get a new type of fleece. The look, fit and comfort are something new within the fleece category of products. The jumper fits relatively close to the body, and a thinner fabric is inserted under the sleeves and along the sides to provide complete freedom of movement for your arms. If you are going to use the fleece jumper as an outer layer, its smooth surface makes sure that dirt won't stick, something you often experience with ordinary fleece jumpers.

With the new generation of fleece jumpers, you get extra features to help keep you warm: a high, close-fitted collar, sleeves that can be pulled down over the hands, and holes for the thumbs.

# When you need a bit more from your sweatshirt

In MASCOT® ADVANCED sweatshirts aren't just simple tops with rib at the hem. Here the category is rethought in features, fabrics and details, and can almost be considered as something between a sweatshirt and a softshell. As with other products in this range, weather protection is included with effective insulation against the cold at the collar and neck.

The fabric is elastic and comfortable, but differs from traditional sweatshirts by having a more modern look. Is your favourite with a hood, full zip, or adjustable collar? With four variations, there is one for every taste and every use.

See the model with a high collar and zip on page 77.

1

STAY DRY

2

KEEP WARM

## Benefit from the innovative and sturdy products in MASCOT® HARDWEAR

1

STAY DRY

### Moisture wicking:

The clothes that you wear closest to the skin must have a strong ability to absorb moisture, transfer it away from the body and distribute it to a larger area to allow the moisture to evaporate quickly.

2

KEEP WARM

### Insulation:

The middle layer should be insulating and breathable. If it is extra cold, you can clothe yourself with several thin insulating layers.

3

WEATHER  
PROTECTION

### Weather protection:

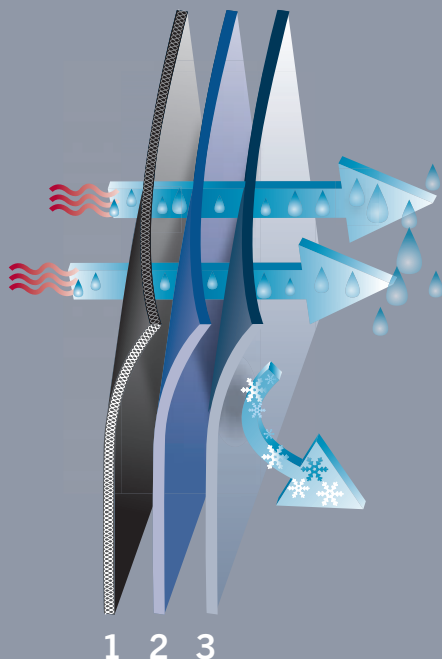

The outer layer should be breathable to allow moisture from the body to escape. In addition, it should be windproof and waterproof/water-repellent.

**3**

## Protection against rain and cold

When cold and rain are really a challenge, you must be able to trust that your workwear will protect you. You can do so by choosing winter workwear with EN 342, protection against cold and EN 343, protection against rain.

# CLIMASCOT®

Lightweight Insulation

RECYCLED CONTENT

## Stay warm with CLIMASCOT® lining

Benefit from a lining of the brand CLIMASCOT® Lightweight Insulation. Besides having a high insulating power, CLIMASCOT® gives you a breathable lightweight material that takes up very little room when compressed. The environment has also been considered with CLIMASCOT®, as it is partially made from recycled materials. Find also CLIMASCOT® lining in other ranges. See winter jacket page 70, jackets page 69 and 74, thermal shirt page 79.

### **MASCOT® HARDWEAR without certified safety**

MASCOT® HARDWEAR combines many advanced and thoroughly tested fabric qualities. The fluorescent details on the products make for easy combinations with MASCOT's hi-vis products.

EN ISO 20471

### **Combine to EN ISO 20471 class 1**

In MASCOT® SAFE SUPREME you will find both trousers and bib & braces in safety class 1. Safety class 1 products often have a smaller area of fluorescent material than the higher safety classes. The reflectors that keep you visible in the dark are of the same high quality as the higher safety classes.

EN ISO 20471

### **Combine to EN ISO 20471 class 2**

The winter jacket MASCOT® Tolosa is breathable, wind and waterproof, and the unique insulation effectively keeps you warm. The jacket combines perfectly with the MASCOT® Kendal trousers, and your outfit will reach a class 2 certification.

## Combine MASCOT® HARDWEAR with safety workwear in different safety classes

If you are required to wear certified safety workwear in certain work situations, the combination of non hi-vis products in MASCOT® HARDWEAR with hi-vis products in MASCOT® SAFE SUPREME, is obvious. The two ranges are created to match and create stylish and functional outfits that hold different safety classes. By combining a hi-vis jumper, trousers or jacket with your ordinary workwear you can easily achieve certified safety workwear in safety class 1, 2 or 3. See a few examples here.

Construction

### Assembly-certification

By combining two individual products with EN ISO 20471 certification, one can achieve Class 3 for the assembled set. For example, a jacket designated as group B (group letter is available on the product label) can be combined with trousers or shorts of groups Y or X to achieve an assembled certification of EN ISO 20471 Class 3.

EN ISO 20471

### Combine to EN ISO 20471 class 3

By wearing the hi-vis gilet MASCOT® Grimsby over a non-fluorescent hoodie and trousers, you achieve safety class 1. If you combine your outfit with the MASCOT® Kendal trousers, your overall outfit will reach the highest safety standard, class 3.

- Zip right through.
- Front pockets with zippers for safe storage.

A man with a beard and short brown hair is looking off to the side. He is wearing a black quilted jacket with a textured surface and reflective silver piping along the seams and pockets. The jacket has a high collar and a zipper closure. The background is a blurred industrial setting with large windows and structural elements.

## Flexible jackets for changing weather conditions

You know the drill, when the seasons change and we go from winter to spring or summer to autumn, a winter jacket can be too warm while a T-shirt or a sweatshirt is not warm enough. For these transition periods, the products on this and the following pages are well-suited. Flexible, lightweight hybrids between jackets and jumpers that each have very special details.

01

09

#### MASCOT® Ripoll | Softshell Jacket with fleece on inner side

Product number: **10002-883**

100% polyester - 270 g/m²

Size: XS-4XL

- Fleece on inner side.
- Chest pocket with vertical zip and easy access - suitable for mobile phone.
- Form cut sleeves with great freedom of movement.
- Adjustable elastic drawstring at waist.
- Extra visibility with the help of reflectors.

09

#### MASCOT® Rota | Jacket with lining and high collar

Product number: **15015-998**

100% polyester - 300 g/m²

Size: S-3XL

- Quilted lining.
- Zip right through.
- High collar.
- Front pockets with zippers for safe storage.
- Elastic at cuffs and waist.

09

#### MASCOT® Haro | Winter Jacket, padded

Product number: **15235-998**

100% polyester - 250 g/m²

Size: S-3XL

- Quilted lining.
- Fur lining at the neck.
- Zip right through.
- Ribbed cuffs.
- Extra visibility with the help of reflectors.

## Lightweight jackets

Is it too cold for a sweatshirt and too warm for a winter jacket? Then look for lightweight tops that give you ultimate freedom of movement and slightly insulating properties. Consider the advantages in a softshell or thermal jacket.

66

**MASCOT® HARDWEAR |** Sweatshirt with embossed MASCOT logo, modern fit

# Trousers in MASCOT® HARDWEAR

MASCOT® HARDWEAR is characterised by a number of innovative fabric qualities. Each fabric quality has been developed to bring something specific to the particular type of work situation. Is it, therefore, important to choose the fabric based on your tasks, the temperature and the weather. Find some ideas here on what to look for when you choose your work trousers.

## DENIM

## SEMI-STRETCH

## CANVAS

Quality number: 207

Composition: 75% cotton/25%polyamide (CORDURA®)

Weight per m²: 385 grams

Special advantages: Trendy denim with high durability

### Jeans for work with durable CORDURA®

The large content of cotton derives from the proud jeans tradition and is what makes the trousers soft and comfortable to wear. Cotton is combined with the durable fibre CORDURA® that makes the trousers extraordinarily durable and suited for people that often wear out their trousers. The trousers have the classic dark denim colour with light stitching.

Find the products on pages 106-109.

Quality number: 010

Composition: 65% polyester/35% cotton (stretch: 92% nylon/8%elestan)

Weight per m²: 310 grams (stretch: 215 grams)

Special advantages: Ultimate comfort and freedom of movement

### Ultimate freedom of movement with stretch

The primary material is the durable and soft fabric quality 010, which has then been combined with stretch inserts. The many elastic inserts at the knee area and the lower back provide a unique freedom of movement that especially is noticeable when you kneel. In addition, the user is guaranteed a high level of durability and puncture resistance as the trousers have many CORDURA® and Kevlar® reinforcements. These reinforcements help give the product a long lifespan.

Find the products on pages 110-113.

Quality number: 010

Composition: 65% polyester/35% cotton

Weight per m²: 310 grams

Special advantages: A durable, soft and stylish classic

### Durable canvas with a rough look

Canvas is a weaving structure that creates a fabric with a rugged, cool look. Durability is high, and there is a bit of stretch in the fabric. This is particularly noticeable when you kneel, and the trousers give a little. Over the years, fabric quality 010 has been a thoroughly tested and popular classic. Find the products on pages 116-123.

## Denim jeans with extraordinary durability

ERGONOMIC  
FIT

KNEE PAD  
POCKET

HOLSTER  
POCKET

1/1  
MAGNET

MASCOT® HARDWEAR | Jeans with holster pockets, extra durable.

Product number: **15131-207**

75% cotton/25% polyamide (CORDURA®) - 385 g/m²

Leg length and size: 76 cm: W30L30 - W36L30 • 82 cm: W29L32 - W38L32 • 87 cm: W29L34 - W40L34 • 92 cm: W32L36 - W36L36

- The low waist with form-cut waistband ensures that the trousers follow and support all body movements.
- Ergonomically shaped trouser legs are constructed to follow the body's natural movements.
- Holster pockets of durable CORDURA® with extra pockets for tools.
- CORDURA® reinforced kneepad pockets - with insertion of kneepads from above, with flap, so they don't collect dirt.
- The use of CORDURA® gives the garment high wear resistance and durability.

## Very durable trouser material

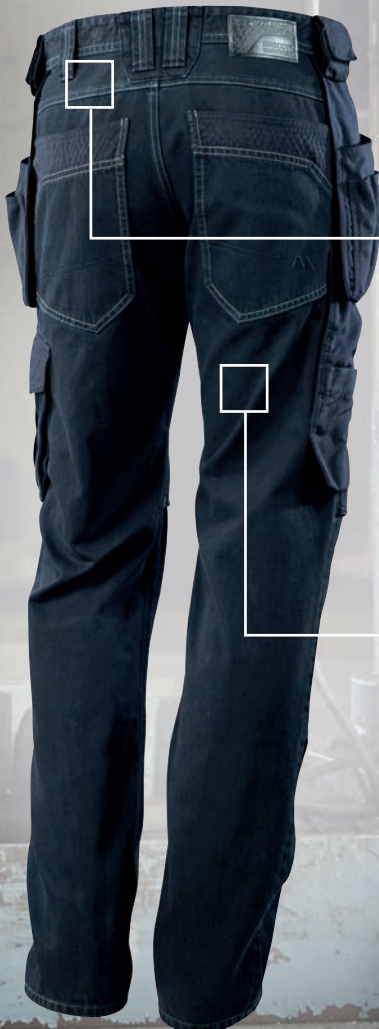

These trousers don't just have CORDURA® reinforcements at exposed areas, the fabric itself has a high content of CORDURA® that increases the durability, for example, on the trousers' thighs, where extra reinforcements aren't suitable.

## Room for tools

The trousers are developed for craftsmen that carry lots of tools in their trousers. The holster pockets and ruler pocket each have divided spaces within the pockets to be used as you wish. The thigh pocket has an automatically closing flap with magnetic fastenings. Under the holster pockets you will find front pockets, at the back you will find two spacious back pockets and at the waistband you will find two tool straps.

## Extremely durable pockets

Holster pockets and kneepad pockets are often the most worn area on trousers, and therefore both the holster pockets and kneepad pockets are made of the durable material CORDURA®. The CORDURA® reinforcements on exposed areas give the product a long lifetime.

## Trousers with super ergonomics

Trousers with an ergonomic fit ensure that the trousers follow the body's natural movements. This means, for example, that the trousers fit closely at the waist as you lean forward and that there is no excess fabric to bunch at the back of the knees, when you kneel. In this way, the ergonomically constructed trouser leg ensures you ultimate freedom of movement.

## Stylish and soft denim

Jeans have a proud tradition through the decades and denim trousers need to have the right look. These trousers are in the traditional blue denim with light stitching. The primary material is cotton, which makes the trousers soft and comfortable to wear.

REFLECTORS

**MASCOT® Adra | Trousers with CORDURA® kneepad pockets, stretch inserts, high durability**

**Product number: 15079-010**

65% polyester/35% cotton - 310 g/m²

Leg length and size: 76 cm: C 46-C 58 • 82 cm: C 42-C 68 • 90 cm: C 46-C 62

- High durability of the front pockets is ensured by CORDURA® reinforcements – especially important when power tools hang from the pockets.
- Many elastic inserts provide unique freedom of movement - especially around the knees.
- Ruler pocket with Kevlar® reinforcement - particularly resistant to pointed and sharp objects.
- CORDURA® reinforced kneepad pockets - with insertion of kneepads from above, with flap, so they don't collect dirt.
- Can easily be extended by 3 cm by releasing the red stitching on the inside.

## Pockets for all purposes

The many practical pockets, some with magnetic fastening, make the use of the trousers flexible and therefore also suitable for all professions within construction. The back thigh pocket can be used for a mini tablet, and in general, the many pockets leave plenty of space for tools.

## Durability at its highest

The trousers have many CORDURA® and Kevlar® reinforcements to give extra durability at exposed areas and increase the overall durability of the product. At the bottom of the ruler pocket you will find Kevlar® - a material that is especially puncture resistant to pointed and sharp objects. The high durability of the front pockets is ensured by CORDURA® reinforcements. These are especially important when power tools hang from the pockets.

## Ventilation at the ergonomically formed trouser leg

The material at the knees has to endure many hours of wear so these have kneepad pockets with the well-known and durable fibre CORDURA®. The kneepad is inserted from above, and the kneepad pocket is closed with a hook and loop fastening and flap, so they don't collect dirt. On the outside of the knees, you'll find ventilation ducts to provide airflow around the knees, where it is often especially warm when using kneepads.

## Stretch for the sake of comfort

The trousers are very comfortable to wear because of the stretch areas that are placed where you need extra flexibility in an active workday. The stretch inserts, especially around the knees and the lower back, lead to increased freedom of movement, particularly when working on your knees. In addition the trousers feature ergonomically designed trouser legs and a fitted waistband so that they follow all body movements.

## Extend the trouser legs yourself

To gain full benefit from the fit and ensure the kneepad pockets are placed correctly, it is vital to choose trousers with the right leg length. The trousers come in three leg lengths as standard, but if your leg length is between sizes, you can easily solve it with these trousers. Instead of shortening your trousers, you can extend the trouser legs by removing the red stitching on the inside - for example with a knife - and gain 3 cm.

**MASCOT® Lerida | Trousers with Kevlar® kneepad pockets, high durability**

**Product number: 05079-010**

65% polyester/35% cotton - 310 g/m²

Leg length and size: 76 cm: C 46-C 56 • 82 cm: C 42-C 68 • 90 cm: C 46-C 62

- Durable triple stitched seams that extend the product life.
- The low waist with form-cut waistband ensures that the trousers follow and support all body movements.
- Ergonomically shaped trouser legs are constructed to follow the body's natural movements.
- Kevlar® kneepad pockets with insertion from the top and with flap so they don't collect dirt.
- Extra visibility with the help of reflectors.

## Rugged look with soft canvas fabric

Canvas is a weaving structure that creates a fabric with a rugged, cool look. Durability is high, and there is a bit of stretch in the fabric. This is particularly noticeable when you kneel, and the trousers give a little.

## Obvious for kneeling work

When you work a lot on your knees, the ergonomics in the trousers are crucial. These trousers have a low waist and form-cut waistband that ensures that the trousers follow and support all body movements.

## Kneepad pockets with high durability and tear strength

The kneepad pockets are made of Kevlar®. Kevlar® is a unique material that provides both high durability and a high tear strength. This is an advantage when you work a lot on your knees – particularly on uneven surfaces. The kneepad is inserted from above and the kneepad pockets are closed with flap and hook and loop fastening, so they don't collect dirt.

## A lot of space for tools

The trousers are equipped with lots of pockets for a busy workday. The spacious, reinforced thigh pocket has a phone pocket and flap closure with hook and loop fastening. The reinforced ruler pocket includes a small external pocket and the reinforced back pockets are securely closed with hook and loop fastening. The hammer loop is adjustable.

## Choose from three leg lengths and many sizes

To gain full benefit from the fit and for the kneepad pockets to be correctly placed, it is essential to choose trousers with the right leg length. The trousers come in three leg lengths as standard. Remember to choose the correct waist size as well so your trousers support in the right places. Get help finding the correct size using the measurement chart on page 610.

# CORDURA® increases durability

High durability is crucial when you are working at a fast pace. MASCOT ensures durability by using lots of CORDURA® fabric on all the exposed places, such as kneepad pockets, holster pockets and ruler pockets. CORDURA® fabric is in fact seven times stronger than cotton.

If you're looking for trousers in 100% cotton, these also give you plenty of room for tools. If you're looking for cotton trousers with fewer details, take a look at the MASCOT® INDUSTRY range on page 136.

**CORDURA®**  
FABRIC

# Keep rain out and comfort in with MASCOTEX®

The pilot jacket is made of MASCOTEX®. MASCOTEX® is a waterproof laminate that is placed inside the polyester outer of a garment. It is this laminate that provides the waterproofness to the fabric. The laminate is also breathable providing a waterproof yet breathable fabric. MASCOTEX® fabric is approved to EN 343, the European Norm for Protective Clothing, measuring protection against rain.
